

近期亞太地區動物傳染病議題分享

疾病診斷組

李璠 研究員兼組長

摘要

亞太地區因地理環境、氣候以及畜牧產業型態的多樣性，使動物疫病的情勢複雜多變。各國政府治理、財政能力與基礎建設的歧異，也會影響各國的動物防疫。本次報告將以口蹄疫、牛結節疹、家禽流行性感冒等傳染病為例，分享這些疾病的相關議題。

Recent Issues on Infectious Animal Diseases in the Asia-Pacific Region

Fan Lee

Abstract

Animal health issues in Asia and Pacific region have been complicated and changing due to the variety in geography, climate, and livestock production system between countries. Differences in governance, finance, and infrastructures between the countries also influence the animal health status of them. In the present presentation, the status of a few infectious animal diseases of concern, notably foot-and-mouth disease, lumpy skin disease, and avian influenza, in this area will be discussed.
